There exists a valid health reason which makes administration of the medication advisable during school hours or during such time that the student is under the supervision of school officials.

Health Care Provider's Signature: _____**Health Care Provider's Printed Name:** _____

Date: _____ Phone #: _____ Fax #: _____

School Nurse Approval: _____ Date: _____

Principal notified if student is self-carrying medication: _____

Authorization for Administration of Medication at Elementary and Middle School

TO: Parents/Legal Guardian, and Licensed Health Care Provider

RE: Administration of oral medication at Elementary and Middle School

Pursuant to RCW 28A.210.260 and RCW 28A.210.270, the Issaquah School District is authorized to administer oral medication to students during school hours. It is district policy that such medications will only be administered when the failure to receive the medication may result in the student being unable to attend school and/or not being well enough to participate in learning activities. The district policy defines medication to mean all drugs, whether prescription or over-the-counter.

The administration of any oral medication to a student by a district employee must be requested and authorized in writing by either a parent or legal guardian **and** a licensed health care provider acting within the scope of his/her license. Specific instructions for administration must be included.

Students may carry and self-administer medication for emergency health reasons when requested by the parent and licensed health care provider and approved by the school nurse and the principal.

Requests for the administration of oral medication are valid only for the medication listed and the dates indicated in writing on the request form, and in no case will such requests exceed one school year. Any request for administration during a subsequent school year shall require the request to be re-authorized.

Medication administered by routes other than oral, for example: ointments, eye drops, nasal inhalers, suppositories, or non-emergency injections, may not be administered by school staff other than registered nurses. Epi-Pen and Epi-Pen Jr. are the only injectables that school staff will be trained to administer to a student who is susceptible to a predetermined, life-endangering situation.

Note to Parents:

All medication must be:

- Brought to school by the parent
- In the original container, labeled with the student's name, name of the medication, dosage, mode of administration, and name of the health care provider (for prescription medication).
- Not more than a one month supply

On request, a pharmacist can provide an extra container—with the required information at the time the prescription is filled.
